

InSite SiteWork and Field General Release 13 System Requirements

DO NOT INSTALL ON ANY SYSTEM WHICH DOES NOT MEET THE FOLLOWING MINIMUM REQUIREMENTS!

Select the system icon in the Windows control panel to check the system specifications.

- **Operating System:** Windows 7, 8.1 or 10
- **System RAM** 4 GB RAM minimum. Importing large CAD files requires more RAM
- ***Video Adapter (Graphics Accelerator) for Image Take-off:** *Minimum 512 MB Dedicated RAM required. 1024 MB recommended for dual monitor support. Call us for help checking the amount of video memory.*
- **Two Monitors:** During training two monitors are required. Two monitors also provide maximum productivity. A trained estimator can use InSite SiteWork on one monitor.
- **Ports:** One USB port for the InSite Site Work Security key.
- **Sound Card and Speakers:** InSite SiteWork plays sounds during take-off. These sounds provide very helpful feedback to reduce errors and decreasing take-off time.

* Dedicated graphics cards use their own memory and DO NOT share system memory. Popular manufacturers include NVIDIA (Geforce) and AMD (Radeon). Such cards are used for graphic intensive applications (AutoCAD, InSite, etc.) and gaming applications.
