Earthwork Takeoff and GPS Modeling Solutions

(877)746-7483

www.insitesoftware.com

InSite Elevation Software for earthwork takeoffs and construction estimating calculates cut and fill, stripping, paving and concrete materials, topsoil re-spread, areas, lengths and item counts.	ELEVATION LITE	SiteWork/ ELEVATION PRO
BILLED ANNUALLY	\$1,740	\$2,940
Take-Off		
PDF with line selection on vector PDFs	*	*
CAD files and drone/data collector import		*
Earthwork Take-Off		
Cut & fill, stripping and demolition	*	*
Number of subgrade adjustments (each Subgrade can have multiple Regions)	20	90
Material take-off (concrete, asphalt, etc.)	*	*
Topsoil re-spread	*	*
Area, length, item count	*	*
Soil boring entry / cut by strata		*
Water table depth, RockAlert™		*
Multi-window interface	*	*
Calculations from triangulation	*	*
3-D Live w/ instant update of grade adjustments	*	*
Site drive throughs		*
Grading schematic	*	*
Cross section view		*
Area cut & fill	*	*
Reports		
Site C & F, Subgrade C & F, Materials, Stripping & Demo	*	*
Cut & fill worksheet		*
Export to PDF, XLS, email and more	*	*
Area, length and item count report	*	*
Tools		
Offsets	*	*
Slope to daylight		*
Split/select tool		*
Multi-phase layer copying utility		*
Dynamic Site Balancer		*
Utility Take-Off		
Sanitary & storm sewer take-off		*
Length by cut bracket		*
Excavation quantities by strata		*
Profile display		*
GPS Machine Control		
Model export (Topcon, Trimble, CAT, Leica, Komatsu, etc.)		*
BIM file export (Revit, Sketchup, etc.)		*
Buildings, points, offsets, vertical curb, road alignments		*
Training		
Initial onboarding class	*	*
Access to all monthly webinars	*	*
Comprehensive manual and training videos	*	*
North American technical support (holidays excluded)	M-F 8am - 8pm ET	24/7
